MAXLAWN Starter Fertilizer & Lawn Revitalizer 12-24-6 is a premium grade of fertilizer formulated for seeding, sodding and revitalizing your lawn. Builds roots fast and strong, growing a healthy lawn.

DIRECTIONS FOR USE:

- **New lawns from seed:** Apply 3.2 pounds per 1,000 sq. ft. Work mechanically into the top 4 to 6 inches of topsoil. After the new seedbed is prepared, work another 3.2 pounds into the top 1 to 2 inches. Then smooth the surface, apply seed, rake lightly or roll, and water moderately. Mulch is recommended to help hold moisture until the new seedlings have emerged. Keep soil moist by watering as needed.
- **New lawns from sod:** Follow the same instructions as with seeding, except the seed now becomes the sod and mulching is not necessary.
- **Overseeding established lawns:** Apply 3.2 pounds per 1,000 sq. ft. Apply new seed at half rate and keep moist. This can be done anytime of year, but for best results spring and fall are preferred due to cool and moist conditions. Another good time for overseeding is following aeration.
- **Lawn Revitalizer:** If your soil test shows that you are deficient in phosphorous and/or potash use MAXLAWN Starter Fertilizer & Lawn Revitalizer 12-24-6 to increase the level in the soil.

For Broadcast Spreaders: Apply to the border of the lawn then work toward the center, overlapping very slightly.

For Drop Spreaders: First apply two strips at ends. Then apply product along the length of the lawn, overlapping very slightly and shutting off spreader when turning.

IMPORTANT: Follow directions as overapplication may cause damage to your lawn. The condition of your spreader and the speed at which you spread may cause differences. For drop spreaders, overlap the wheel tracks to insure complete coverage. A broadcast spreader should slightly overlap swathe to insure proper coverage. Close spreader openings when filling, turning, or stopping. Do not apply fertilizer by hand.

Calibrating spreader: Adjust spreader to apply 1 pound of product per 310 sq.ft. **Spreading patterns:** First spread the borders of your lawn. Then spread the center by spreading in straight line passes. Spread at a uniform walking speed to insure even coverage.

Coverage

To determine the square footage of the application area, multiply the length of the lawn by its width. This equals your total square footage. Deduct any non-lawn areas (driveway, sidewalk, house, etc.) One bag covers 5,000 sq. ft. or 3.2 pounds per 1,000 sq. ft.

1st APPLICATION
Early Spring

2nd APPLICATION
Mid-April thru July

3rd APPLICATION
June thru September or Anytime

4th APPLICATION
Late Aug. thru Nov.

LAWN CARE PROGRAM

CAUTION
KEEP OUT OF REACH OF CHILDREN

This product may be harmful if swallowed and may cause skin and eye irritation. Wash skin with soap and water after handling. If in eyes, flush eyes with plenty of water as soon as possible.
